Re: Letter of Support for FPIN Membership for John Doe, MD

Dear Ms. Gericke,

As Vice Dean for the College of Medicine at the Medical Health Science Center, it is with great enthusiasm that I offer my full support of the application for FPIN Membership submitted by John Doe, MD., Program Director and Assistant Professor of Family Medicine with the Medical Health Science Center College of Medicine.

Dr. Doe is the newly appointed program director of our developing family medicine residency at the Healthcare System in Columbia, MO. His passion for family medicine and scholarly interests are congruent with the mission of the Medical Health Science Center; advancing the knowledge and technologies of our profession to bring Missourians the finest in health education, promotion, and care.

Through the FPIN Community, Dr. Doe will begin collaborating with our network of affiliated residency programs throughout Missouri, further advancing the practice of evidence-based primary care.

I fully support Dr. Doe's application and wholly endorse his membership in the FPIN community. The advancement of our medical specialty in the 21st century requires active scholarly pursuits of committed primary care physicians.

Sincerely,
